## Anti-Drone

FPV anti-drone

- ▶ **It can be used both independently and as part of a detection station.**
- ▶ **Optical target guidance and target capture allows to avoid enemy electronic warfare.**
- ▶ **Warhead initiation is possible remotely using a magnetometer, barometer, altimeter, accelerometer, lidar.**
- ▶ **Frequency offset control and proprietary antennas for each frequency ranges: 190–1020 MHz, 2100**

To perform the functions of intercepting attack drones by detonating a combat fragmentation charge. It is effective for intercepting, including large UAVs. It can be used both independently and as part of a detection station. Optical target guidance and target capture allows to avoid enemy electronic warfare.

Warhead initiation is possible remotely using a magnetometer, barometer, altimeter, accelerometer, lidar. Frequency offset control and proprietary antennas for each frequency ranges: 190–1020 MHz, 2100 MHz–2700 MHz.

Size	7 inch
MTOW	1,5 kg
Engine type	electric
Maximum Range	17 km
Cruise Speed	300 km/h
Max flight time	20 min
Attack Guidance	GNSS, Visual Navigation optical guidance
Payload	1 kg

**Rasid Radar  
Equipment  
Manufacturing,  
L.L.C.**
